### Criteria applied by MYTILINEOS

In preparing the Subject Matter, MYTILINEOS applied the following criteria:

MYTILINEOS S.A.

Independent Limited Assurance Report to the management of MYTILINEOS S.A. on the Sustainable Development Report 2022

- 1 The criteria set in the GRI Universal Standards 2021 including the GRI reporting principles for report quality and proper presentation of the reported information; accuracy, balance, clarity, comparability, completeness, sustainability context, timeliness and verifiability.
- 2 UN Sustainable Development Goals (UN SDGs) and the GRI organization's publication named "SDG Compass Linking the SDGs and GRI", developed by the GRI, the UNGC and the World Business Council on Sustainable Development (WBCSD).
- 3 AccountAbility's AA1000 Principles Standard ('AA1000AS').

### **MYTILINEOS's responsibilities**

MYTILINEOS's management is responsible for selecting the Criteria, and for presenting the Subject Matter in accordance with that Criteria, in all material respects. This responsibility includes establishing and maintaining internal controls, maintaining adequate records, and making estimates that are relevant to the preparation of the subject matter, such that it is free from material misstatement, whether due to fraud or error.

### **KPMG's responsibilities**

Our responsibility is to express a conclusion on the presentation of the Subject Matter based on the evidence we have obtained.

We conducted our engagement in accordance with the *International Standard for Assurance Engagements Other Than Audits or Reviews of Historical Financial Information* ('ISAE 3000') and the requirements of a Type 2 assurance engagement, as defined by AA1000AS. Those standards require that we plan and perform our engagement to obtain limited assurance about whether, in all material respects, the Subject Matter is presented in accordance with the Criteria, and to issue a report. The nature, timing, and extent of the procedures selected depend on our judgment, including an assessment of the risk of material misstatement, whether due to fraud or error.

We believe that the evidence obtained is sufficient and appropriate to provide a basis for our limited assurance conclusions.

### **Our Independence and Quality Control**

We have maintained our independence and confirm that we have met the requirements of the Code of Ethics for Professional Accountants issued by the International Ethics Standards Board for Accountants and have the required competencies and experience to conduct this assurance engagement.

KPMG also applies International Standard on Quality Control 1, Quality Control for Firms that Perform Audits and Reviews of Financial Statements, and Other Assurance and Related Services Engagements, and accordingly maintains a comprehensive system of quality control including documented policies and procedures regarding compliance with ethical requirements, professional standards, and applicable legal and regulatory requirements.

### **Description of procedures performed**

Procedures performed in a limited assurance engagement vary in nature and timing from, and are less in extent than for, a reasonable assurance engagement. Consequently, the level of assurance obtained in a limited assurance engagement is substantially lower than the assurance that would have been obtained had a reasonable assurance engagement been performed. Our

MYTILINEOS S.A.

procedures were designed to obtain a limited level of assurance on which to base our conclusion and do not provide all the evidence that would be required to provide a reasonable level of assurance.

Although we considered the effectiveness of management's internal controls when determining the nature and extent of our procedures, our assurance engagement was not designed to provide assurance on internal controls. Our procedures did not include testing controls or performing procedures relating to checking aggregation or calculation of data within IT systems.

A limited assurance engagement consists of making enquiries, primarily of persons responsible for preparing the Subject Matter and related information and applying analytical and other appropriate procedures.

Our procedures included:

- 1 Performed interviews with certain MYTILINEOS's managers to understand the status of sustainability activities and processes for the reporting period.
- 2 Checked MYTILINEOS's processes for determining material issues to be included in the Report, as well as the coverage of material issues within the Report.
- 3 Interviewed specialists responsible for managing, collecting, and reviewing sustainability data reported for internal and public reporting purposes, linked to the GRI General and Specific Disclosures under the scope of our assurance engagement (indicated in the assurance column of the GRI Content Index with a mark, pp. 172-185 of the Report).
- 4 Checked the Report for the appropriate transposition and presentation of the sustainability data linked to the GRI General and Specific Disclosures under the scope of our assurance engagement (indicated in the assurance column of the GRI Content Index with a mark, pp. 172-185 of the Report), including limitations and assumptions relating to how these data are presented within the Report.
- 5 Read information or explanations to substantiate key data, statements and assertions regarding the sustainability disclosures under the scope of our assurance engagement.

We also performed such other procedures as we considered necessary in the circumstances.

Our procedures did not include third-party activities / performance and system testing (IT&T or other), attendance to stakeholder engagement events or site visits outside of Greece. For the Sustainable Development Report the scope excludes assurance of financial data.

## **Conclusion**

Based on our procedures and the evidence obtained, we are not aware of any material modifications that should be made to Subject Matter in order for it to be in accordance with the Criteria.
